“

I am privileged to be part of this significantly impactful partnership between Oracle and Wipro, one that consistently empowers our clients to achieve significant business outcomes and advance technological innovation. The customer case study book stands as a testament to the transformative work we have accomplished together, showcasing the tangible results of our collaborative efforts in driving businesses to new heights of success.

Ravi Seshadhri

Vice President and
Global Head for Oracle Practice,
Wipro

“

At Wipro, in partnership with Oracle, we're dedicated to leveraging technology's transformative power to tackle complex challenges for leading global brands and organizations. Our journey with Oracle goes beyond traditional transformation, combining our expertise and innovation to deliver unmatched value and empower our customers to envision their future possibilities. This collection of top customer case studies showcases our commitment to excellence and our continuous effort to create a more efficient, sustainable future for businesses worldwide.

Harish Dwarkanahalli

President-Enterprise Applications,
Wipro

Introduction & Wipro's Oracle Practice at-a-Glance

A captivating compilation of transformative customer success stories showcasing the dynamic partnership between Wipro and Oracle. This exclusive publication offers a firsthand glimpse into the remarkable collaborations that have propelled numerous businesses to unprecedented heights.

Through a series of compelling case studies spanning diverse industries, readers will witness the tangible impact of Wipro and Oracle's collective expertise in driving

innovation, enhancing operational efficiency, and delivering unparalleled value to customers. As a testament to the power of collaboration, these stories serve as a source of inspiration for organizations seeking to harness the combined strengths of Wipro and Oracle to revolutionize their technological landscape ensuring organizational transformation and elevate their competitive edge.

Wipro is one of Oracle's key global system integrator partners, with a relationship

spanning over 25 years. This partnership offers our clients the opportunity to align with Oracle's robust suite of product and to combine those with Wipro's industry domain expertise, consulting capabilities, devotion to customer success, and digital ecosystem. With a focus on innovation and collaboration, we deliver transformative solutions that address unique challenges and drive meaningful outcomes.

Transforming a Leading Logistics Company's Financial Operations for 49 Countries

Industry: Logistics

Geo: Europe

Service: Implementation

Tech Stack: Oracle Fusion
Cloud Applications - ERP

Ambitions

The client embarked upon an ambitious program to transform their financial operations through deployment of Cloud ERP to 49 countries. This global transformation was designed to create a positive impact for over 1500 core finance users and over 30,000 self-service users in a multiyear rollout program.

Actions

Wipro embarked on its transformative journey using a strategic phased “Beach Head” approach, initially introducing new business processes in a select group of pilot countries including Australia, Austria, and Germany. This was followed by Wipro implementing a unified Oracle Cloud instance across all its business locations worldwide. After each successful deployment, Wipro assumed responsibility for the managed services within that country. Wipro also enhanced its operations by building a Gen AI solution for supplier enquiries. This solution provides specific insights in tabulated form utilizing a large language model thereby reducing manual dependency.

Ambitions Realized

Approximately

cost savings by implementing
our Gen AI solution

Wipro's Cloud-First Strategy Revolutionizes an American Airport Terminal

Industry: Aviation

Geo: Americas

Service: Implementation

Tech Stack: Oracle Fusion Cloud Applications – ERP, SCM, PPM

Ambitions

The company aimed to elevate its customer experience to unprecedented levels, aspiring to secure and maintain a position within the 'Top 5 Skytrax' rankings for its New Terminal One. The vision encompasses a scalable, flexible, and efficient solution architecture that adhered to stringent internal controls. The challenge was to find a partner with a proven track record in deploying sophisticated cloud solutions and expertise in business process reengineering to meet these ambitious goals. Wipro is that chosen partner.

Actions

Wipro defined a comprehensive strategy by proposing to implement Oracle Financials, SCM, Projects, EPM, Procurement Cloud, and leveraging its proprietary 'Zoom to Cloud' approach. This included the use of tools like Jumpstart and QuMiC for accelerated business process mapping and data migration. As part of the program, Wipro integrated our Cloud solution with SITA systems for airline passenger billing, Schneider Utilities for leased-asset invoicing, HR systems and banks for real time cash management along with AR/GL reconciliation. Oracle xOffice was introduced as a central hub for data aggregation and orchestration, ensuring seamless integration with ERP and other systems. Wipro utilized Oracle Integration Cloud (OIC) for flawless connectivity between SaaS applications, third-party applications, and on-premise systems. The automation of payments will be achieved through the Intelligent Document Recognition (IDR) feature in Accounts Payable. Additionally, Wipro provided P&L, balance sheet, and cash flow reporting in multiple standards (US GAAP and IFRS) using EPM and aligned Organizational Change Management (OCM) to ensure users are well informed and connected for exceptional user engagement.

Ambitions Realized

99% accuracy in transaction processing expected

Real time integration with XOffice and ERP Cloud

Faster decision making expected with centralized data management for multiple streams

Strict adherence to both US GAAP (Generally Accepted Accounting Principles) and IFRS (International Financial Reporting Standards) compliance

Wipro Drives Digital Transformation for a Leading Water Utility in Brazil

Industry: Water Utility

Geo: Latin America

Service: Implementation

Tech Stack: Oracle Fusion Cloud
Applications – ERP, SCM, HCM, PPM, EPM

Ambitions

The client faced significant challenges, including fragmented systems across business areas, lack of standardized processes, and an absence of integrated management systems. This led to operational inefficiencies, high volumes of paper transactions, and a deficit in operational and management indicators for informed decision-making. Additionally, inefficient remote monitoring of activities due to reduced staff compounded these challenges, especially in the face of Brazil's new basic sanitation legal framework aiming for extensive service expansion by 2033.

Actions

Wipro embarked on a transformative journey with the client. As part of the implementation, Oracle Cloud modules implemented included. Oracle ERP, Supply Chain, Fleet Management, OTM, HCM, BI, Budget and Planning, Integration using OIC and Local Taxation and Payroll with 3rd party solutions. Wipro accelerated digital transformation through Oracle ERP Cloud, standardizing and harmonizing end-to-end ERP and SCM business processes.

Benefits

15% faster decision-making
with real-time analytics

forecast accuracy

Improved customer experience
with quicker request turnaround

Enhanced reliability for
investors and external bodies

Standardized business
processes and reduced people
dependency

Transforming Healthcare Delivery: A Large Hospital of Jeddah's Innovative Partnership with Wipro

Industry: Healthcare

Geo: Middle East

Service: Implementation and Managed services

Tech Stack: OCI and Oracle Fusion Cloud Applications – ERP, SCM, HCM, CX

Ambitions

The client was grappling with inefficiency in financial reporting due to manual data entry. Processes were laborious, and spanned over 10 days for financial closures, resulting in doctor's payouts delays and numerous errors.

Actions

Wipro was able to swiftly implement Oracle Cloud modules including Fusion ERP, HCM cloud and SCM cloud at the hospital within a mere 63 days. In less than four months, Wipro's unique solution leveraged Oracle Cloud Infrastructure (OCI) to develop a groundbreaking doctor payout process tailored to client's specific transparency requirements. This solution involved a sophisticated mechanism for calculating compensation for doctors and integrating existing data flowing from various sources including ERP, HR, SCM, and EMR systems. Wipro's revolutionary approach included detailed deliverables ensuring seamless integration. Wipro's solution for doctor's payouts, set to launch by June 2024 on the OCI platform, promises customizable efficiency tailored to our client's unique needs.

Following the integration of Oracle Cloud solutions, the hospital has achieved measurable improvements across its operations. The hospital has reported cost reductions in the range of 20-30%, attributing these savings to decreased capital expenditure on hardware and more precise resource management. These financial efficiencies have been complemented by marked gains in operational productivity: Financial closings are now 80% faster, asset turnover time has improved by 30%, and there is an initiative in place to further streamline this process.

Ambitions Realized

80%

reduction in financial closing time

20%

cost savings

50%

increase in productivity

Revolutionizing Sustainability in Saudi Arabia: Optimizing ERP Processes for a Leading Electric Vehicle Manufacturer

Industry: Manufacturing

Geo: Middle East

Service: Implementation and Managed Services

Tech Stack: Oracle Fusion Cloud Applications – ERP, HCM, SCM, PPM, CX

Ambitions

A visionary manufacturer of electric vehicles in Saudi Arabia, aimed to revolutionize the nation's approach to sustainability by planning to establish 1,000 charging points with 5,000 EV chargers by 2030. This ambitious project faced challenges in integrating complex systems within a tight timeline, ensuring seamless data exchange between critical systems, and achieving a significant reduction in IT costs.

Actions

Wipro had proposed a vanilla implementation for client, recognizing its dual nature as a service and asset-based company. To ensure a seamless integration, Wipro adopted its Zoom-to-Cloud methodology that incorporated hybrid agile principles. This approach facilitated the comprehensive implementation of all Oracle Cloud modules, including EPM, HR, Financials, SCM, and CX, tailored to meet client's specific needs. To ensure the success of this implementation, Wipro employed a three-tier governance model, fostering collaboration, participation, and synergy between client teams (platform owner, business function heads, and other functions) and Wipro's own teams. By leveraging Oracle's robust technology and Wipro's expertise, the team achieved successful implementation within remarkable 70 working days.

Ambitions Realized

10%

IT Cost Savings

operational efficiency improvement

2-3

days of month end activities processing time from 5-6 days

Revamped Logistics Planning for a German Manufacturer with Oracle Transport Management (OTM)

Industry: Manufacturing

Geo: Europe

Service: Implementation

Tech Stack: Oracle Fusion Cloud Applications - Transportation Management

Ambitions

The client aimed to revolutionize their transportation management system focusing on standardization, cost optimization, and localization across global operations. They sought to standardize carrier collaboration and shipment processes, achieve complete cost visibility for efficient deliveries, adapt to local legal and business requirements, and introduce multi-modal transport options for urgent shipments.

Actions

Wipro responded by globally implementing Oracle Transportation Management (OTM), beginning with pilot phases in Hirschaid and Cheraw, across all transport modes. The solution harmonized planning and settlement processes, incorporating advanced OTM planning, scheduling, and innovative features like dispute management not originally part of OTM. This approach also included a new workbench for invoice approval and dispute handling, tailored for logistics service providers. By integrating specific business considerations and focusing on end-to-end automation with minimal manual interventions, Wipro crafted a solution that streamlined the client's transportation logistics, aligning closely with their strategic goals.

Ambitions Realized

15%

reduction in transportation cost

Smooth and seamless dispute management process

Greater visibility on shipping status

Wipro Revolutionizes a USA's Water Works Company's Billing Operations for Enhanced Water Utilities Management

Industry: Utilities

Geo: Americas

Service: Implementation and Managed Services

Tech Stack: Oracle Utilities Cloud-Customer Cloud Service

Ambitions

The company wanted to engage a strong IT partner to revolutionize its CRM, billing, and service bureau operations. With a focus on seamless customer care and scalable solutions and to meet service expansion goals, the company worked with Wipro to migrate their current on-premises Customer Information System (CIS) Customer Care & Billing version 2.4 to Oracle Customer Cloud Service including ensuring a robust training and user experience.

Actions

Wipro upgraded the company's Customer Care and Billing application to version 2.4. and implemented Oracle CCS. The system, accessible across devices, streamlined operations for over 904000 customers. Integrations with 100 systems facilitated seamless Meter to Cash flow and automated maintenance tasks. Employees were trained with a sustainable set of videos to ensure seamless adoption from Go Live Day One. Post a successful go live, Wipro seamlessly transitioned to support to ensure ongoing customer success.

Ambitions Realized

Significant productivity improvements in billing operations and customer management areas up to

30% automation of existing business processes

50% growth in promoting usage of overall paperless by bills

28% increase in autopay customer space by using an integrated self-service channel

Charting New Horizons: An Emirates Based Multinational Logistics Company Sets Sail with Wipro for Multi Country Rollout Success

Industry: Logistics

Geo: Middle East

Service: Implementation

Tech Stack: Oracle Fusion Cloud Applications – ERP, SCM, HCM and EPM Cloud

Ambitions

The Client had to define and navigate a complex multi-country rollout. In a transformation across 25+ nations, the client needed to tackle diverse legacy systems and fragmented manual processes. Hindered by custom applications, scalability and speed to market were significant challenges. Through the partnership with Wipro, a transformational strategy was implemented to ensure the client could streamline and achieve global supply chain excellence.

Actions

Team Wipro overcame complexity with a standardized global model and an “ERP in a Box” rollout strategy. Wipro implemented Oracle Cloud ERP, SCM, HCM and EPM Cloud across five continents ensuring standardized global processes. The client’s dedicated Global Transformation Office team drove the significant change to cloud and partnered with Wipro to facilitate and accelerate deployment by using Wipro’s IPs like Jumpstart, QuMiC and Touchless Configuration Bots. Including global communications and organized change management, Wipro maintained design integrity and release management, while the client's adoption of the overall cloud solutions without customization led to revolutionary improvements in efficiency and user acceptance.

Ambitions Realized

60%

acceleration in
invoice processing

10%

reduction in

and HR processes

A Multichannel Television Provider: Orchestrating Success through Unified HR Transformation with Oracle HCM Cloud

Industry: Telecom

Geo: Americas

Service: Implementation

Tech Stack: Oracle Fusion Cloud Application – HCM – Talent and Learning, Fusion Analytics Warehouse

Ambitions

In the dynamic telecom industry, the company faced challenges with dispersed HR records and a lack of analytics. With 16,000 global employees, the absence of a unified system hindered efficiency. The company aimed to transition to Oracle HCM Cloud, align stakeholders, ensure user adoption and foster a holistic HR view.

Actions

They partnered with Wipro to implement Oracle Cloud Talent and Learning Management, and Fusion Analytics Warehouse. Wipro orchestrated a major migration from SuccessFactors to Oracle HCM Cloud, covering 16,000 employees in multiple countries. That move enabled comprehensive dashboard reporting which provided executives with both a clear and detailed view of the business, enhancing decision making. They also ensured user adoption through training and a robust communications strategy.

Ambitions Realized

100%

operational efficiency achieved in integration, eliminating manual processes

improvement in manager's efficiency due to consolidation of clouds into single application

Robust

talent and learning management system aligned seamlessly with business processes

Digital Transformation for an International Fast Fashion Retailer, with over 380 stores in 13 countries

Industry: Retail

Geo: Europe

Service: Implementation

Tech Stack: Oracle Retail

Ambitions

The retailer embarked on a digital transformation program with the view to support its rapid global growth plans. Business processes were reviewed, as well as systems, to enable this growth across the entire value chain including retail, supply chain, buying, merchandising and finance.

Actions

Wipro established a fully robust and scalable Oracle platform (Retail and Financials) as the backbone for simplification. The rollout approach was an incremental phased strategy, first with Purchase- to-Pay processes followed by receipt-to-sell ensured a seamless integration between ERP and other subsystems through Enterprise Service Bus integration. In addition, Wipro enabled self-service by implementing user friendly data warehouse and analytical tool.

Ambitions Realized

TCO reduction through simplification of the landscape and implementation of the enterprise service bus

Scalable platforms to support growth plans

Visibility of data at granular level to make better purchase and pricing decisions

Wipro's Strategic Alliance with Saudi's Royal Perfume Retailer: Elevating Perfume Retail Excellence

Industry: Consumer goods

Geo: Middle East

Service: Implementation
& Managed services

Tech Stack: Oracle Retail - xStore

Ambitions

Our client sought to enhance customer experience with Oracle Retail Xstore POS but faced integration hurdles, prompting a switch. Collaborating with Wipro, they aimed to optimize retail operations, marking a significant stride in their quest for excellence.

Actions

Wipro devised a streamlined solution for the organization by deploying the latest Oracle Retail Xstore version, tailored to surmount integration challenges. Leveraging previous configurations, Wipro expedited implementation, capitalizing on existing knowledge to minimize setup time. This efficient approach ensured a swift transition, empowering the team to focus on delivering exceptional customer experiences without delay.

American Retailer Redefines Customer Experience with Oracle Retail XStore & Customer Engagement

Industry: Retail

Geo: Americas

Service: Implementation

Tech Stack: Oracle Retail

Ambitions

A renowned American clothing company, known for its iconic denim jeans, faced the challenge of adapting to a consumer-centric market. The shift demanded enhanced customer experiences, refined pricing strategies, and an omnichannel supply chain to stay competitive. A pivotal element of this strategy was the implementation, rollout, and support of Xstore globally. This initiative was critical to harmonize the retail experience across all touchpoints, ensuring consistency and efficiency in their operations worldwide.

Actions

The engagement extended to providing an integrated IT service delivery framework for consumer digital technologies spanning B2B, B2C, and physical stores. A key innovation introduced by Wipro was the incorporation of automation in service delivery, aiming to enhance efficiency and responsiveness across the retailer's digital and physical operations.

Ambitions Realized

Streamlined support, operational efficiencies

Automated, proactive monitoring

Reduced risks and costs

Harmonizing Manufacturing Excellence: A Symphony of Transformation with Wipro

Industry: Manufacturing

Geo: Middle East

Service: Implementation

Tech Stack: Oracle Fusion Cloud Applications
– ERP, SCM, HCM, CX and EPM

Ambitions

In the competitive manufacturing arena, our client, a global CPG supplier, faced a dissonance of challenges. Aged systems hindered enterprise processes, and visibility gaps impacted fulfillment and responsiveness. Paper-based HR processes and governance lapses in key cycles added to the complexity.

Actions

Wipro orchestrated a transformative solution, streamlining processes into a business overture leading the world's first manufacturing cloud implementation, by centralizing client's ERP system with Oracle's ERP Cloud that synchronized planning, and digitalization through IoT sensors revolutionized every facet, turning chaos into harmony. Along with Oracle ERP Cloud, Wipro also implemented Oracle Cloud SCM, CX and EPM cloud effecting an end-to-end transformation of the organization's business processes. This is one of the first Oracle manufacturing cloud implementations carried out globally and Wipro developed a PaaS solution to integrate data capture in real time at shopfloor.

Ambitions Realized

Delivering Excellence: Transformation Journey of One of the Biggest Steel Manufacturers of the World

Industry: Manufacturing

Geo: Americas

Service: Implementation

Tech Stack: Oracle Fusion
Cloud Applications - EPM

Ambitions

Amidst shifting regulatory landscape, the company grappled with challenges with product costing. Manual handling at a broad product family level obscured detailed analysis, hindering management's visibility into production costs, sales costs, and profit margins for individual products. Seeking consistency across locations, they aimed to enhance decision-making with granular impact analysis. Furthermore, compliance requirements loomed as they faced the daunting task of providing SKU level product costing data to the US department of commerce.

Actions

Wipro deployed an Oracle EPM cloud platform to deliver accurate “driver-based” allocations. Direct and indirect costs could be allocated using actual cost drivers for every step in production, regardless of location. In addition, profit margins for each SKU could be calculated using a multi-level allocation process, allowing the company to perform impact analyses for product costing and profit margins at a granular level across the enterprise.

Ambitions Realized

Wipro's Strategic Partnership Enhances Operations at USA's Largest Manufacturer of HVAC, Unifying Manufacturing Excellence

Industry: Manufacturing

Geo: Americas

Service: Implementation

Tech Stack: Oracle E-Business Suite, Oracle Fusion Cloud Applications - HCM

Ambitions

The Leading HVAC manufacturer grappled with fragmented operations and high warranty costs. Processes across sales, warehouses, and plants lacked cohesion, hampering visibility and efficiency. Route optimization and warranty claim clarity were also pressing concerns. The company sought a solution which could streamline its processes and improve efficiency.

Actions

Wipro has been a long-term strategic partner of the company. When the company embarked on the "Being one" initiative to streamline operations globally with core focus on improving efficiency and cohesion, Wipro helped consolidate systems, unify units, and standardize processes. Wipro transformed and designed business processes based on industry best practices across functions including financials, corporate reporting, procurement, manufacturing, SCM, transportation & logistics leveraging Oracle E-Business Suite (EBS R12). Standardized accounting and supplier processes improved efficiency. Outbound payments were optimized with Oracle Transport Management (OTM 6.2) and EBS integration. A user-friendly warranty management solution was implemented. Wipro also implemented Oracle HCM cloud which helped standardize and streamline HR processes thereby improving employee productivity.

Ambitions Realized

8%

reduction in fraudulent claims

15%

increase in supplier recovery

8%

Wipro Transforms an American Chain of Discount Department Store's Operations by Re-implementing Oracle Peoplesoft

Industry: Retail

Geo: Americas

Service: Implementation and Managed services

Tech Stack: Peoplesoft

Ambitions

The company faced the challenge of updating its Peoplesoft systems which are critical for HR and Payroll operations. To enhance self-service capabilities and automation, they decided to replace Peoplesoft Finance 8.0 with a modern and supportable application platform. This posed a significant hurdle, compounded by the challenge of leveraging out-of-the-box processes for better integration and automation.

Actions

The company and Wipro partnered to re-implement Peoplesoft, utilizing a mixed agile model and integrated governance for flexibility and comprehensive coverage. Embracing outcome-based pricing, they prioritized transparency and accountability for successful implementation. Wipro continues to maintain and run the company's landscape offering continuous improvement initiatives.

Ambitions Realized

92% auto-match due to Industry leading Retail Invoice matching engine

90% reduction in paperwork in the CFO organization due to process improvements, workflows and system leverage

Streamlined procurement engine of approximately

\$2 Bn annually

Wipro's Data Migration Mastery Streamlines Global HR Giant's ERP Transformation

Industry: Professional Services

Geo: Americas

Service: Implementation and Managed Services

Tech Stack: Oracle Fusion Cloud Applications- ERP, PeopleSoft

Ambitions

A global leader in contingent staffing and recruitment, the company embarked on a transformative journey to shift from legacy systems to Oracle ERP Cloud, spanning over 3500 branch offices in 75 countries. The primary challenges included integrating disparate data from various legacy systems such as PeopleSoft, SUN, Right Management, and Experis, each with unique data structures and formats. Additionally, ensuring consistency in master data to prevent conflicts during cloud rollouts was a significant hurdle, necessitating a sophisticated and tailored data migration approach.

Actions

Wipro was engaged to leverage its Data Migration as a Service catalogue, offering the client the flexibility to customize requirements and pay only for specific services. Utilizing QuMiC, Wipro facilitated the migration of master and transaction data from diverse legacy systems to Oracle Fusion ERP Cloud. This process involved extracting, transforming, validating, loading, and reconciling data, applying over 300 complex transformations and validations against source data before loading. Wipro developed an automated custom file upload process, transforming legacy system data into a cloud-ready format. Additionally, a customized reconciliation process was implemented to ensure the quality and accuracy of the migrated data, addressing the client's challenges head-on and paving the way for a seamless ERP cloud transformation.

Ambitions Realized

50%

faster migration of data and configuration

Error Free

migration due to minimized manual intervention and automated data migration

Faster data conversion, lower conversion cost, centralized repository

Japanese Mobility Manufacturer in Collaboration with Wipro Accelerates Innovation

Industry: Manufacturing

Geo: Americas

Service: Implementation

Tech Stack: Oracle CX Cloud

Ambitions

The company faced challenges in rapidly accessing relevant technical content across channels and consolidating information for over 4000 North American dealerships. They aimed to enhance user experience by combining real-time support with technical knowledge assistance, while also establishing robust processes for knowledge creation and sharing.

Actions

The company transformed their user experience with Oracle CX Service Cloud, streamlining knowledge processes and real-time support. Advanced search and tailored solutions reduced bandwidth dependency, driving efficiency and satisfaction.

Ambitions Realized

Seamless Integration: How Wipro Enhanced Operational Efficiency for America's Leading Casual and Inner Wear Cloth Manufacturer

Industry: Retail

Geo: Americas

Service: Managed services

Tech Stack: Oracle E-Business Suite, Oracle Fusion Cloud Applications – ERP, SCM

Ambitions

A leading American cloth manufacturer of inner wear struggled with maintaining operational efficiency, particularly in managing legacy IT applications and Oracle EBS modules focused on supply chain and distribution. The company required expert support to streamline these critical areas, ensuring seamless operations from production to distribution.

Actions

Wipro, having been a trusted partner since 2013, streamlined the company's operations. Wipro swiftly managed their Oracle EBS installation and rollouts, assembling a dedicated team to address evolving distribution needs. Opting for Oracle EBS with bespoke bolt-ons, they embraced innovation. Now, Wipro oversees a comprehensive suite of services, from ERP to legacy systems, ensuring seamless operations. Over the years Wipro ensured to keep the customer's Oracle EBS landscape upgraded to the latest version and recently have started supporting their cloud journey globally.

Ambitions Realized

50%

reduction in total one time of the critical and order scheduling job stream

100%

of the tickets are audited using Galaxy audit bot, the actions are tracked to continuously improve ticket quality

Performance optimization achieved for several business critical jobs like receiving transaction processor

Wipro Transforms IT Operations for a Major American Tech Conglomerate

Industry: Telecom

Geo: Americas

Service: Managed Services and Application Development

Tech Stack: Oracle Fusion Cloud Applications – SCM

Ambitions

To achieve operational excellence, the organization aims to enhance ERP, SCM, Inventory, OM, and WMS solutions. Simultaneously, they seek to improve customer experience by reducing MTTR (Mean Time to Resolution), backlogs, and ensuring SLA adherence. Additionally, maintaining continuity for critical services—such as period close, testing, quarterly updates, and effective support—is a priority.

Actions

Wipro utilized its Thrive in Cloud framework to manage clients' operations across two continents, enhancing support services with automation, standardization, and efficiency. They introduced a Best-in-Class Cloud Target Operating Model, incorporating agile and DevOps, and improved efficiency with automated testing tools like Wista and a regression testing suite. Period close activities were cut by 20% using bots, and user experience was boosted by Wipro's My Personal Assistant (MPA) Bot, which automates tasks through image and text recognition. Wipro ensures ongoing improvements with seamless enhancements and quarterly updates.

Ambitions Realized

20% reduction in close efforts

25%

faster migration of config and data between client's production and sandbox environments with QuMiC

Energy Giant's Digital Shift: Wipro's Solution for Complex Hybrid Environment

Ambitions

A multinational energy company faced complex challenges: a hybrid environment with 30 Oracle Cloud modules, 450+ integrations, and 6,000 new cloud users. Additional challenges included limited user knowledge and adoption and a multi-vendor environment.

Actions

Wipro's next-gen AMS solution streamlined the company's operations, ensuring a risk-free transition with its build-to-run framework. Wipro introduced an L1.5 function for efficiency and aligned systems with the company's digital command and control center. By integrating digital controls and process mining, Wipro empowered the company to proactively optimize performance and drive continual improvement.

Ambitions Realized

15% YoY reduction in ticket counts

50% proposed reduction in FTE count for over the span of five years

Wipro established an inhouse academy for a comprehensive knowledge management framework to build competencies and train the resources on demand for building and transferring the business knowledge

Smooth Cloud Support and Continuous Business Evolution at A Global Life Insurance Group

Industry: BFSI

Geo: ANZ

Service: Managed services

Tech Stack: Oracle Fusion Cloud Applications – ERP, EPM

Ambitions

The client contended with outdated finance applications and struggled to navigate frequent cloud updates and inefficiencies in their AMS model. Their process was bogged down by manual interventions which hindered progress. The lack of agile practices left them unable to quickly adapt market changes, posing a significant challenge in staying competitive and maximizing their cloud investment's potential.

Actions

Wipro provided a comprehensive approach to revitalize its client's cloud operations by assuming end-to-end management of key ERP and EPM Cloud application modules including GL and Payables Cloud, FCCS, and PBCS. This approach included Wipro's "Thrive-in-Cloud Model," which optimized Business-As-Usual (BAU) services, Release Management, Testing Support, Training, and Automation processes. To ensure seamless operations and effective handling of escalations, Wipro established a robust three-tier governance structure, integrating Single Points of Contact (SPOCs) from both the client and Wipro's support teams at every escalation level. Embracing innovation, Wipro introduced automated reconciliation processes utilizing Wipro's Holmes bots to further streamline operations. The adoption of a core-flex support model with shared services underscored a commitment to cost-effective engagement. Additionally, Wipro's proactive Quarterly Updates Advisory and implementation strategy ensured that the client remained at the forefront of technological advancements, with a detailed review process for analyzing new features and functionalities.

Ambitions Realized

12% reduction in ticket resolution time

50% reduction in ticket escalation

Transforming Energy Operations: Leveraging Wipro's Expertise to Create an Integrated Operating Model

Industry: Energy Services

Geo: Middle East

Service: Implementation & Managed services

Tech Stack: Oracle E-Business Suite, Oracle Fusion Cloud Application - ERP, SCM, Projects, HCM

Ambitions

The company was in the process of migrating from Oracle EBS to Oracle Fusion Cloud Applications. They faced challenges with fragmented operations and inefficient ticket resolution. To address this, they sought an integrated operating model with end-to-end ownership and upskilling at the L1.5 level. Proactive maintenance was lacking, necessitating a comprehensive knowledge repository for the integration of best practices. With Wipro's expertise, they aimed to streamline processes and enhance operational efficiency.

Actions

Wipro's solution for the energy company was a game-changer. They navigated a seamless transition, filling implementation gaps with SOPs and training. Overlooked enhancements were tackled head-on, while stringent SLAs were exceeded, marking a new era of operational excellence. Wipro ensured a seamless transition of support from on-premises to Cloud. Wipro is rolling out fusion cloud modules across new countries: UAE, India, Thailand, and Turkmenistan.

Ambitions Realized

10%

Leveling Up the Game: A Strategic Transformation for a Gaming Industry Titan

Industry: Media & Entertainment
Tech products and platform

Americas

Service: Implementation
& Managed services

Tech Stack: Oracle E-Business Suite,
Oracle Cloud Infrastructure

Ambitions

A leading company pioneering the early gaming industry with a \$5.6 billion annual revenue sought to upgrade its Oracle E-Business Suite (EBS) for enhanced functionality and improved performance. Along with improved performance they also wanted to ensure a cost-effective solution. With this technical upgrade, the client aimed to validate processes, ensuring seamless operations during go-live, while also requiring integration with Oracle R12.2.9. for boundary systems.

Actions

Wipro has been a trusted IT partner for the client for more than a decade now. As part of our relationship, Wipro has supported multiple initiatives for them. The engagement initially began with stabilizing their extensive applications landscape, bringing in automation and offering continuous improvement leading to 25% improvement in MTTR. Next, Wipro helped to standardize their business processes in Oracle EBS applications including global rollouts in other geographies. The OCI migration project delivered by Wipro created a major cost benefit with the reduction in OPEX. Post OCI migration, Wipro did a massive upgrade project to bring the EBS instance to the latest version and in the process enabled Oracle Enterprise Command Centre and generated custom dashboards for management reporting. Recently with a mandate to transform their managed services landscape, a lot of AI and Gen AI initiatives have been proposed and will be implemented in the coming months.

Ambitions Realized

20% reduction in IT Ops spend consolidation

15% overall manual efforts saving due to automation

20% faster decision making enabled with single global cloud instance

Wipro's Innovative System Architecture Solutions Empower a Global Manufacturer of HVAC systems

Industry: Manufacturing

Geo: Americas

Service: Managed services

Tech Stack: Oracle E-Business Suite, Oracle Transportation Management

Ambitions

The company faced several challenges in their IT landscape, including complex architecture with heterogeneous ERP systems (such as Oracle, PeopleSoft, and local/Cloud ERPs), Transportation Management System, real-time integration, and reporting. Additionally, they needed IT re-organization, application rationalization, and acceleration of projects through test automation. Migrating to IaaS, refactoring legacy applications, and fostering agile, digital, and cloud transformation were also priorities. To drive continuous improvement, the client embraced agile, DevOps, and ITIL practices.

Actions

Wipro got into a long-term strategic engagement for managing their entire application landscape. Managing their diverse application landscape was crucial, as the company dealt with over 1000 applications across multiple functional categories, including EBS, PeopleSoft, Siebel, OTM and non-Oracle applications. To enhance operational efficiency, Wipro implemented a proven governance model aligned with ITIL practices. Wipro also adopted an Agile DevSecOps approach, focusing on maturity assessments, continuous service improvement, and an agile journey. Core modernization was a priority, with an assessment of their application portfolio for rationalization and a journey towards the cloud. Finally, Wipro future-proofed their operations by establishing an Innovation Council, conducting value stream mapping, and assessing ROI.

Wipro Enhances HRMS Support for a Leading Mining Enterprise in the ANZ Region

Industry: Construction, Mining

Geo: ANZ

Service: Managed services

Tech Stack: Oracle Fusion
Cloud Applications - HCM

Ambitions

The company's HRMS journey was marked by diverse challenges including :- unifying five companies into one platform, coordinating payroll interfaces with outsourced partners, integrating over 30 homegrown applications, modernizing a legacy recruitment system, and managing user data for Australia and New Zealand entities.

Actions

Wipro streamlined the company's HRMS, ensuring smooth transitions and regulatory compliance. By managing critical interfaces, integrating payroll systems, and maintaining high system uptime, Wipro ensured consistent data integrity across the region.

Ambitions Realized

10% YoY productivity increased

Enabling a Leading Southeast Asian Transport Authority to Optimize Process with a Centralized Collection and Billing Solution

Industry: Public Sector

Geo: APAC

Service: Implementation and Managed Services

Tech Stack: Oracle Utilities - Oracle Customer Care & Billing

Ambitions

The board of authority faced challenges in the objective of creating a centralized billing system. First, they needed to consolidate disparate billing systems into a single, efficient collection and billing platform. Additionally, they sought a unified view of customers across various transactions, including vehicle registration, traffic violations, parking, and publications. Finally, automatic reconciliation and digitization of collections were essential for streamlining their operations.

Actions

Wipro collaborated with the customer to create a centralized collection and refunds platform using Oracle Customer Care and Billing. Additionally, Wipro developed a digital self-service portal for customers, automated bank reconciliation and integrated with third-party payment gateways, established ERP integration with a third party ERP, and ensured regulatory reporting and compliance.

Ambitions Realized

Improved collection efficiency

High degree of automation in journalizing and bank reconciliation

Established single source of truth across all business systems

Single system of records across the enterprise for all collections and refunds across various business systems

Transforming Success: How Wipro Enhanced Saudi's Event Management Company's Excellence

Industry: Event Management

Geo: Middle East

Service: Managed services

Tech Stack: Oracle Fusion Cloud Applications – ERP, SCM, HCM

Ambitions

The client had moved to Cloud but was encountering challenges due to an initial troubled faulty implementation. Despite inheriting errors and a lack of transition, they addressed business process issues, data inaccuracies, and enhanced customizations. However, challenges persisted with end-user adoption and limited system access. Nonetheless, Wipro's rapid intervention aimed to swiftly rectify issues and propel the client towards success.

Actions

Wipro swiftly transformed the company's Oracle Fusion, addressing gaps, re-implementing modules, and resolving configuration and data issues. Round-the-clock support and effective change management ensured seamless user adoption, backed by impactful value demonstrations and CEO endorsement.

Ambitions Realized

15% increase in employee engagement

5% improvement in decision making accuracy

Middle East's Largest Bank Collaborates with Wipro to Accelerate Innovation and Transform Customer Experience Across the Region's Banking Sector

Industry: BFSI

Geo: Middle East

Service: Implementation

Tech Stack: Oracle E-Business Suite, OFSAA

Ambitions

At the core of the Middle East's banking sector, the region's largest bank faced significant operational challenges — including the absence of a staging environment, over 45 disparate subsystems, 40 million daily transactions, complex system integrations, and low end-user adoption. In collaboration with Wipro, the bank embarked on a transformative journey to drive innovation and elevate customer experience across its digital banking ecosystem.

Actions

The bank tackled challenges with a strategic plan: Global design, region-based rollouts over three years, and four phases. Wipro implemented Oracle Financials, integrating with OFSAA, Financial Accounting Hub and Oracle EBS General Ledger. The transformation embarked with two pilots targeted specific regions and products. Integration was key to the program's success, spanning 45+ subsystems including cards, trade finance and e-channels.

Ambitions Realized

Supported EBS & Fusion HCM Landscape for seamless business operations

Wipro Empowers a United Nations Agency: Streamlining Multi-Country Set-up and Regulatory Reporting

Industry: Healthcare

Geo: Europe

Service: Managed services

Tech Stack: Oracle E-Business Suite

Ambitions

The agency faced a plethora of challenges: Managing multi-country set-ups with numerous ledgers and business units; ensuring localization in payroll and compensation across diverse regions and navigating complex grants accounting and regulatory reporting requirements globally.

Actions

Wipro’s approach for the agency was dynamic and effective. By being a trusted IT partner for the agency, Wipro was able to unify operations and align with the agency’s global strategy ensuring seamless progress towards excellence. Wipro took over the entire complex management of 20 applications. In doing so, Wipro was able to affect a 10% YoY productivity improvement and adopted outcome-based pricing. Over the years Wipro ensured to keep the agencies’ Oracle EBS landscape upgraded to the latest version and in the process enabled them to also adopt best practices and retire customizations.

Wipro's Managed Services Drive Operational Excellence for a Digital Security and Identity Management Company

Industry: Digital Security

Geo: Americas

Service: Managed services

Tech Stack: Oracle E-Business Suite

Ambitions

The client is on a growth trajectory, requiring optimized operations and strategic resource management to scale effectively. Facing a fragmented outsourcing approach, they sought consolidation to improve efficiency, scalability, and resource control. They needed a strategic partner to act as an advisor—driving continuous improvement and enabling flexible scaling, with the option to transfer operations back in-house post-contract. The client was using Oracle EBS to manage core back-office processes, along with 70+ boundary applications.

- Integration of other systems with EBS
- Application modernization journey with cloud adoption
- Phase one focused on logistics and transportation

Actions

As part of this engagement, Wipro modernized legacy applications by refactoring them into microservices, containerizing components, adopting SaaS platforms, and deploying GenAI-powered self-service tools to accelerate feature delivery, enhance user experience, and prepare the estate for a full cloud journey. We implemented Oracle Transportation Management Cloud to optimize logistics workflows and reduce total cost of ownership. Wipro scaled the team through an academy-style onboarding program, SME retention initiatives, and targeted upskilling to sustain high-performing talent. Efficient operations were enabled through risk-mitigated transitions, streamlined processes, and proactive command-center oversight for EBS and its boundary applications. In phase two, we developed a comprehensive roadmap to guide the client's cloud journey.

Ambitions Realized

25% overall productivity gains over 5 years

75% talent rehire for product engineering

1.5% of service revenue allocated to a co-innovation fund

Zero disruption to BAU – silent transition

Delivering Seamless Operations for a Global Manufacturing Firm with Oracle Fusion Cloud Managed Services

Industry: Manufacturing

Geo: APAC

Service: Managed services

Tech Stack: Oracle HCM, Finance, and Procurement Cloud

Ambitions

The client is a global automotive components manufacturer and part of the Fortune Global 500 list. They utilize Oracle Fusion Cloud to manage back-office functions and were seeking a reliable and expert Oracle Application Maintenance Service provider to support ongoing system optimization, streamline business processes, and enhance employee engagement.

Actions

Wipro established support operations for the client's back-office systems and ensured a smooth, accelerated transition from the incumbent managed service provider using our RapidTx methodology. We fully automated quarterly update testing and drove productivity improvements through accelerators and automation tools. A dedicated client CoE team was established to serve as a one-stop advisory for solution consulting. To help the client fully leverage Oracle Fusion Cloud functionalities, Wipro prepared an enhancement roadmap covering:

- Job architecture review and implementation as part of core HR.
- Integration of job and position profiles with talent modules such as Performance Management, Skills, Training, and ORC.
- Fit-gap analysis of existing ORC features and implementation based on business requirements.

AI Enablement – Oracle Dynamic Skills

- Wipro plans to enable Oracle Dynamic Skills to help organizations manage and grow capabilities with a tailored, always-current skills dataset.
- Oracle Dynamic Skills intelligently identifies, infers, matches, and recommends skills, seamlessly connecting a dynamic network of people, jobs, projects, and resources.
- Oracle Skills Advisor, part of Dynamic Skills, delivers personalized skills recommendations across various talent management processes for candidates, employees, managers, recruiters, and administrators.

Ambitions Realized

- Expected **15%** reduction in cost of ownership
- **25%** acceleration in new hiring
- Faster fulfillment of open roles through dynamic skills matching
- Smooth transition with zero disruption

End-to-End Managed Services for a Global Humanitarian Organization Using Oracle Fusion Applications

Industry: Migration

Geo: Europe

Service: Managed services

Tech Stack: Oracle Fusion Cloud

Ambitions

The client is a UN-affiliated organization committed to fostering humane and orderly migration globally. They sought a trusted Oracle Application Maintenance Service provider to support strategic HR operations. To align with their mission-driven objectives, the organization required a partner with deep expertise across the full Oracle Fusion Cloud suite. Ensuring a seamless, low-risk transition was a top priority. Additionally, they emphasized the need for a vendor capable of managing a high volume of support tickets and delivering agile, round-the-clock service through a robust “Follow the Sun” support model.

Actions

Wipro leveraged its Thrive in Cloud framework to deliver a comprehensive portfolio of managed services across Oracle Fusion Cloud modules, including HCM, SCM, Financials, EPM, PaaS, Risk Management, and Portfolio Management. To ensure efficient delivery of critical business functionalities, Wipro proposed a tailored Target Operating Model aligned with the client’s needs. Advanced tools and accelerators were deployed, such as:

Zero Touch Integration Analyzer for payload consolidation, error detection, and root cause analysis

WiOSTAS for building a robust automated regression test suite

A strong governance model was established to drive strategic alignment, enhance operational transparency, and define accountability. Additionally, Wipro implemented a 24x6 shift plan to ensure consistent coverage for Tier-2 and Tier-3 services.

Ambitions Realized

20%

effort reduction in quarter-end closure through RPA

Wipro's Solutions, Services & Accelerators for Oracle

Wipro's Solutions for Oracle Cloud

Zoom to Cloud

Wipro's Zoom to Cloud (ZTC) is a robust, secure, and reliable methodology designed to handle the entire transformation to Oracle Cloud. It offers an accelerated implementation procedure that can be tailored to an organization's technical requirements and business goals. With (ZTC), our clients can achieve 30% faster migration to cloud with its set of proprietary tools and accelerators.

Oracle Cloud Freedom Migration

Wipro's Cloud Freedom Migration to OCI managed services offering enables organizations to seamlessly migrate Oracle workloads to OCI. Leveraging a six-step cloud migration approach, Wipro offers a risk-mitigated, accelerated, and secure OCI migration at zero cost. The offering allows organizations to reduce total cost of ownership by 25 to 40%.

Wipro's Retail Industry Solution

Designed to help retailers adapt to the ever-ongoing challenges for the industry, Wipro's Retail Transformation Solution for Oracle is designed to help retailers adapt to these ongoing challenges that offers a complete range of solutions & services for making supply chains more efficient, optimizing pricing and promotion strategies, and building effective omnichannel customer experiences.

Wipro's LIBRO for Banking and Finance Industry (BFSI)

To propel their businesses forward and compete effectively, financial institutions need to tread a fine line between growth and risk. This means unifying data and processes to get a single operating layer for finance and risk.

Wipro's LIBRO is a single integrated solution for digital enablement which combines Risk, Finance, and Compliance. LIBRO empowers financial institutions to streamline their processes and gain valuable insights from data-driven analytics.

Wipro's Utilities of Future Solution

The Wipro Utilities of Future is a holistic solution designed to meet the evolving needs of Energy & Water Utilities. Powered by Oracle cloud, this solution focuses on key areas such as enhancing customer experience, modernizing the Meter to Cash Process, implementing advanced technologies and AI/ML capabilities for resilient grids, providing integrated back-office solutions, and ensuring comprehensive ESG and regulatory reporting. By addressing these critical aspects, the Wipro Utilities of Future offering aims to equip utilities with the tools and capabilities needed to effectively manage the ever-changing consumer and market demands.

Wipro's Services for Oracle Cloud

Business Consulting

Leverage [Wipro's Digital Navigator Advisory \(DNA\)](#) to identify critical business priorities that can be achieved by implementing Oracle Cloud. It helps to maximize value and establishes an optimal roadmap to cloud.

Implementation, Integration & Rollout services

Leverage [Wipro Zoom to Cloud Methodology](#) to empower business transformation with a functional and technical solution that is aligned with business goals. This is an accelerated methodology using modern best practices.

Managed Services

Leverage [Wipro Thrive in Cloud framework](#) for Oracle Cloud application management services to realize business value while providing a platform for continuous innovation.

Oracle Cloud Applications Development

[Wipro](#) offers end-to-end digital transformation for enterprise-wide applications across CX, HR, Finance and Supply chain.

Wipro's Accelerators

Wipro's accelerators are designed to empower enterprises by streamlining and enhancing their Oracle solutions. These accelerators enable a faster implementation through improved efficiencies, reducing operational costs, optimizing performance and ultimately driving better business outcomes for our clients.

Wipro's Accelerators for Oracle Cloud

Wipro's Jumpstart Kit for Oracle Cloud is a set of enterprise business process maps spanning from the high-level function to task level activity flow. These cover key enterprise processes like Order to Cash, Source to Settle, Hire to Retire, Record to Report, Plan to Produce.

Wipro QuMiC (Quick Migration to Oracle Cloud) platform helps accelerate the transformation to Oracle Cloud. It automates the migration of data approximately 33% faster, including data validations and reconciliations; the functional setup and configuration about 24% faster, and thus ensures a reliable Cloud implementation.

Wipro's Touchless Configuration bots alleviate the problem of repetitive processes by automation. These bots automate module-wise functional configuration (extensively covering several modules), transaction entry for key configurations and execution of test scripts as part of quarterly product updates.

Wipro OCI CloudShift is a GUI based automation tool with modular design and aligns with industry best practices around architecture and cloud migration. The tool helps to implement the entire cloud landing zone, migration automation for Oracle databases and applications. It reduces overall migration timeline and cost by 35%.

AI First Approach

Wipro leads the path towards predictive, preventive, and personalized services harnessing the power of AI to elevate the delivery of implementation.

Generative AI: Generative AI, synthetic data generation, application development, report generation, and potential threat detection are key components of our advanced technology suite, enabling comprehensive solutions for various industry challenges.

Technology Solutions: Our technology solutions encompass process automation, the Wipro Generative AI framework (WEGA), Inspect AI, and intelligent document processing, providing comprehensive tools to streamline operations and enhance efficiency across various domains.

Services: Our services encompass establishing a Maturity Index for AI rollout roadmap (E-IQ – Enterprise Intelligence Quotient), consulting and integrating 3rd party products, providing end-to-end support and maintenance, as well as incorporating complementary technologies to ensure comprehensive and seamless solutions for our clients.

AI/Machine Learning: Our expertise includes AI/machine learning, deep learning neural networks, metaheuristic soft computing, ensemble techniques, and big data, enabling us to develop advanced solutions that harness the power of cutting-edge technologies to address complex challenges across diverse domains.

Where Wipro added value:

Large Telecom Equipment Manufacturer– Reduced application development by 30% using GenAI for App development.

Medical Equipment Company– Reduced the customer emails response time by 50% by using language models to read and respond to emails.

Large Insurance Company– Created hyper-personalized email campaign using GenAI and ML based client segmentation.

Large Utility Provider– Prediction 24 hours before a severity 2 and severity 3 that could develop into Severity 1 and causing significant disruption.

Our Customers Speak for Themselves

“

We chose Wipro as our strategic partner because of their deep technology expertise, domain knowledge and industry insights. Wipro's integrated perspective has helped us connect the dots and identify the optimal roadmap for our transformation program.”

David Swan

- CEO, Precision Group

“

Our vision was to drive towards customer excellence and innovation. We chose Wipro as our strategic partner because of their ability to align to this vision with deep technology expertise, domain knowledge and industry insights. Wipro's integrated perspective has helped us connect the dots and identify the optimal roadmap for our transformation program.”

Kim Damsgaard,

- Head of Digital Transformation, NRGi

“

Wipro's deep understanding of KCH's unique requirements and challenges reinforced their decision to choose Oracle ERP Cloud. Leveraging Oracle's best practices and innovative solutions, Wipro guided King's College Hospital through the implementation process. Remarkably, the implementation of Oracle ERP Cloud, covering modules such as ERP, HCM, and SCM, was completed in just 63 days, showcasing Wipro's efficiency and expertise. The deployment of Oracle ERP Cloud brought about significant benefits for KCH. Financial closing time reduced by 80%, manual workload decreased by 50%, and turnover time improved by 30%. “Leveraging Wipro's deep industry knowledge, **King's College Hospital has transformed its financial operations** and uplifted the quality of patient care, setting a new benchmark for healthcare excellence.”

Pankaj Bajaj

- CIO, Kings College Hospital

“

Wipro's dedication and hard work have been instrumental in meeting our project deadlines and achieving the goals we set out. Wipro's customer-centric approach not only delivered, but also exemplified a spirit of partnership and commitment that was truly remarkable.”

Marcos Dussoni

- CFO, EVIQ

“

Wipro has demonstrated exceptional commitment as our ERP partner in the implementation of the Oracle Fusion Cloud ERP System. Their team tackled challenges with professionalism, timeliness, and efficiency—often going above and beyond by working outside regular hours. We truly appreciate their dedication and support throughout this critical project.”

Patrick McCrea

- CFO – AMHC (Al Madinah Heritage Company)

“

Wipro has been instrumental in driving digital transformation at JFK Terminal One through the strategic use of AI and Oracle Cloud. Their expertise has helped streamline financial operations, improve forecasting accuracy, and enhance overall operational efficiency. With Wipro's support, we're laying the foundation for a smarter, more responsive airport experience. Their forward-thinking approach continues to shape the future of airline finance.”

Manoj Patel

- Chief Financial Officer, JFK New Terminal One

About Wipro

One of the largest, most trusted, purpose-driven technology companies in the world.

Wipro Limited is a leading multinational corporation that provides information technology, consulting and business process services.

We believe ambition has the power to unite us, inspire us, and move us forward. But unlocking these possibilities can only happen when ambition meets innovative ideas meet transformational strategies.

By bringing together consulting, design, engineering, implementation, operations, and a passion for customer success, we make our clients' ambitions a reality, orchestrating a holistic portfolio of capabilities that enable digital and organizational transformation.
